LinkedIn: [linkedin.com/in/prajwal-murgod](https://www.linkedin.com/in/prajwal-murgod) | GitHub: github.com/Prajwal15M

PROFESSIONAL SUMMARY

Enthusiastic and responsible individual aiming to work in a reputed organization that values dedication and growth. Committed to enhancing professional skills through hands-on experience and learning. Seeks to contribute meaningfully toward organizational progress while achieving long-term career goals.

EDUCATION

B.E. Computer Science & Engineering | Jain College of Engineering and Technology (2023-2027) | CGPA: 8.2

II PUC | Mahesh PU College | 87%

SSLC | SBIOAES English Medium School | 73.6%

TECHNICAL EXPERTISE

Programming: Java, Python, JavaScript, PHP, C, C++

Frontend: React.js, HTML5, CSS3, | Backend: Node.js, Express.js, Flask, FastAPI, Flask

AI/ML: Scikit-learn, Pandas, NumPy, OpenAI Whisper

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Streamlit, WAMP

SELECTED PROJECTS

Study Buddy AI Learning Assistant

Study Buddy AI Learning Assistant Developed an AI-based web application that generates quizzes from uploaded study notes using NLP. The system includes secure authentication, automated evaluation, progress tracking, and gamification features such as XP and badges to enhance learning engagement.

Technologies: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, NLP

Medical Insurance Cost Predictor

A web application that predicts medical insurance costs based on personal health and demographic information. Users input their age, sex, BMI, number of children, smoking status, and region to receive an estimated annual insurance premium.

Technologies: React.js, HTML5, CSS3, Flask (Python), Linear Regression model, Vercel

CampusHub

Developed a responsive role-based dashboard application with separate User and Admin interfaces for efficient system management. Implemented role-based authentication with secure session persistence, protected routing, user profile management, system monitoring, activity tracking, and user administration. Designed a modern, responsive UI with reusable components and modular architecture, making the application scalable and ready for backend API integration.

Technologies: React.js, React Router DOM, CSS3, JavaScript, LocalStorage

CERTIFICATIONS

- Google Analytics Certification (GA4) - Google (Apr 2026)
- Advanced Python - Simplilearn (May 2026)
